

ToolsUnited

brought to you by CIMSOURCE

Since 2001, **ToolsUnited** has been the leading search engine and data source for cutting tools. At our locations in Germany, Japan, and the USA, you'll find our team of software developers and engineers you can rely on. This comprehensive expertise makes us an exceptional partner when it comes to your digitization measures!

For our partners who make the tools, **ToolsUnited's** parent company, **CIMSOURCE GmbH**, offers a range of advanced technologies to help generate detailed 3D models automatically, and to effectively distribute their data seamlessly

ToolsUnited

Your tool to find the perfect tool.

Search.

Our advanced search technology makes it easy to find the exact tool you'll need for your machining application. Search by specifying the required tool properties, specific application, or tool's intended use.

Download.

Easily download a 3D digital twin of your tool for NC verification. You can download data and specifications for many different CAM systems and even export to industry standards such as ISO13399/GTC, DIN4000.
